Award Summary

Ending the HIV Epidemic in the U.S.

75% reduction in new HIV infections in 5 years and at least **90%** reduction in 10 years.

Diagnose all people with HIV as early as possible.

Treat the infection rapidly and effectively to achieve sustained viral suppression.

Prevent new HIV transmissions by using proven interventions, including pre-exposure prophylaxis (PrEP) and syringe services programs (SSPs).

Respond quickly to potential HIV outbreaks to get needed prevention and treatment services to people who need them.
